

# *Welcome to Chipstead Valley Primary School*

At our school we have flora and fauna ,  
we have lots of spiky bushes like this one in our picture

# NATURE IN CHIPSTEAD!

In Chipstead Valley primary school we have many fun activities to participate in such as sports day which takes place in summer. We have lots of flora and fauna where we live and see a different range of birds, such as bluetits, robins, heron, parakeets, wood pigeons and thrushes. Our pond is filled with amazing wildlife and is a place of peace. Our field is a wonderful place to play in the hot summer. Lots of parents join us after school once a year to see our music concert. We even have our own chickens.

# Conserving Nature

*There are many simple things that can be done to help conserve nature:*

*In our school woodland area we have bird houses made out of wood to keep all of our birds safe and happy. They make nests and sometimes lay eggs inside the bird houses.*

*We also do not cut down many trees because if we do then it could disturb the birds homes.*

*Pupils in our school also made bug hotels for insects to live in.*

*We keep all of our plants healthy by watering them in the summer and we never break the bamboo or other plants.*

*We have never built over animals homes and we always take care of our chickens.*

# How we can care for nature

We can care for nature  
by treating our animals  
nicely. Also by not  
cutting down trees.

# How To Access Chipstead Valley!

Luckily for our pupils, access to the outdoor spaces is simple! We have ramps and smooth surfaces for pupils who use wheelchairs and our running track makes it possible for everyone to join in with the run. Our school can be accessed by foot, car, bus or train and Coulsdon has many transport links to nearby towns such as Croydon and central London.

# Our recreational activities

We do a weekly run at school, using our track and playgrounds. One of the best sections of the track goes through our woods.  
Our field is used regularly throughout the summer and at the weekend an archery club uses it.  
Football matches and other team sports are also played here.

# Our Flora, Fauna and Landscapes

Our flora is the plants that grow naturally in our school grounds. e.g: Sunflowers, daisies, lavender and trees such as oak, chestnut and apple.

Fauna: Gold Finches, Parakeet, Robin, Heron, Woodpeckers, Bluetits, we also have Foxes, Badgers, Spiders, Ants, Moles, Worms, Deer and lots more.

The landscape has lots of hills, woodland, open fields, and a pond. Although it is quite a bust area with lots of roads and houses, we are lucky to also have beautiful views and green spaces.

# Our outdoor area.

In our outdoor area we have school Chickens and we go outside sometimes and look at them and play with them its really funny. In the summer we go out on our field and we really like playing in the sun. there is a massive footbaur outll pitch in the field.

Thank you for  
reading this  
book!
