

**Come with us on an  
adventure on CVPS  
grounds!**

Welcome to our school, we  
hope you enjoy the  
adventure. Lets get started!

There is lots of nature in these grounds which are full of plants and insects, such as bees and grasshoppers. There are also birds such as green parakeets, herons, robins and pigeons.

**Flora and**  
**Landscape**

We have lots of flowers, plants and trees, we also have a willow-structure and a relaxing, calming and peaceful pond. In the pond we have tadpoles, which turn into frogs, and fish. Our willow structure is made out of wood and is curved at the top, inside are lots of leaves on the ground and mushrooms that grow on the side of it.

We love this school, the lessons are so good!

## Access

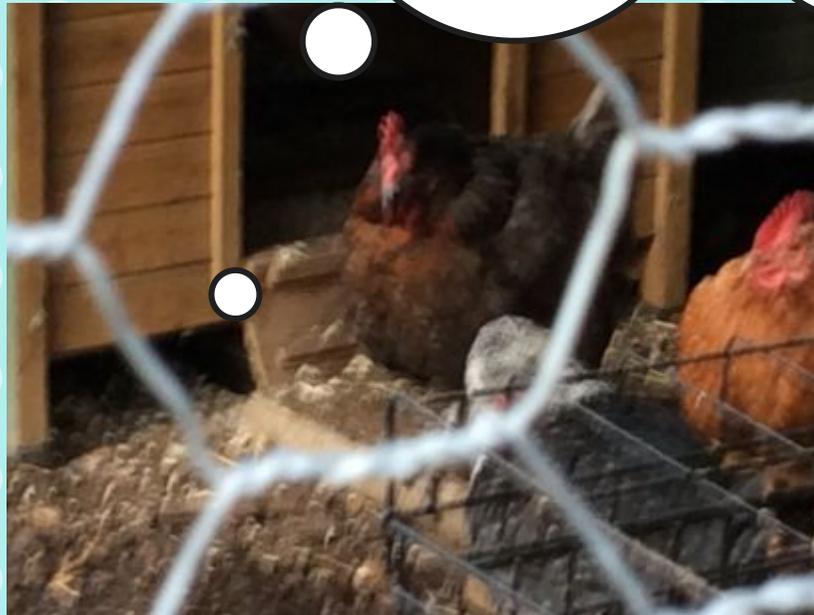

We mainly use cars to get to school, but some people walk to school or even use trains and buses. People can also cycle here on their bike. Traveling to school using a scooter is a common way to travel. For disabled students, we have a special mini buses so they can travel home safely. We also have ramps at school to let people in wheelchairs get around. Another way normal students travel in the snow is using a sledge or a snow board. Here is one of our school gates.

## Fauna

*We have a lot of wildlife here, including green parakeets, bluetits, deer with cute white dots by their tail and badgers with black and white stripes. Herons also nest here in Chipstead. Did you know that a female owl actually hoots twit and the male hoots twoot.*

**Conserving:**

If you cut down trees or you'll ruin nature and you will destroy animals' homes because animals live in nature.

There are so many trees here - so I can save my acorns for later!

## Recreational

*Playing sports is very important because it is healthy. Some activities we do are football, rugby and sometimes in summer we play rounders. At our school we attend many sports festivals and host our own sports days on our large field.*

Here is a picture of some people playing a game of tag. Every week we do PE. This allows us to go outside and do sporting activities.

# Cultural Activities

Our cultural sports are Rugby, Football, cricket and tennis. We think this is important because its to do with daily health. One of our schools cultural activities is our school summer concert, disco. Another is our summer fair.

THANK YOU!

Thank you for reading our presentation!
