**Science:** We will be starting back with a week of science investigations and later in the term we will be observing and testing different materials that we may be able to use to design and make our very own superhero capes!

English links: Children will be looking at explanation texts, non-fiction writing explaining a process or event. They will be creating their own work based around this learning.

PHSE / Values: With the return to school our initial focus will be on settling the children back into the school environment, ensuring they feel happy, safe and confident to share their emotions. We will also work on developing communication skills through working in groups.

**History / Geography:**

In History we will be looking at the life of David Attenborough and in Geography at climate change and how it affects different continents.

**Maths:** We will be continuing to embed the operations that the children are already familiar with whilst consolidating the children's reasoning skills.

**Outdoor Provision:** We will continue to use outdoor provision for all aspects of our learning as this allows the children to explore practical elements to their learning.

**MFL / International:** HOLA! We will continue our foreign adventure by learning days of the week and months of the year and animals.

**Art/DT:** The topic of Heroes offers us opportunities to work on line and tone formation through portraiture. Linking with our science work, we will be looking at paper weaving and repeating patterns.

**RE:** We will be looking at Christianity and Sacred Writings.
