

Maths:

As well as recapping counting in 2's, 5's and 10's, in maths we will be moving on to multiplication and division. Children will begin to make equal groups, add equal groups and make arrays to help with multiplying. They will also start sharing to help with dividing.

English:

In English the children will focus on the story 'Greta and the Giants' as it tells the story of a girl who attempts to save the planet from the greedy giants that are destroying it. We will draw a story mountain and a story map to help us remember the story. Eventually we will retell the story with lots of conjunctions and adjectives.

Science:

This term in science, the children will be learning about a range of materials and their properties. From this, the children should be able to group materials in to groups based on their physical characteristics. This should help the children make decisions about what material is best for making certain things.

They will learn not only what material things are made of, but also where that material is sourced. For example, a pencil is made from wood, but the wood comes from trees.

Geography:

We will be learning about Greta Thunberg, what she believes and what she has already done to fight global warming. We will also have a discussion about what changes may happen in the world because of global warming.

YEAR 1 OUR PLANET

**Art/DT:**

The children have been collecting bottle lids throughout the half term and we will be using these to plan and create a sculpture on the school grounds. This sculpture will be based around reducing plastic in the ocean. The children have been learning about recycling and the 3 R's (reduce, reuse, recycle) to help with the overwhelming amount of waste.

The children will be coming up with examples of different pictures that they could make out of the bottle tops and the different colours we will need to complete their design.

Wellbeing Curriculum:

The children will be focusing on how to stay healthy and talking about how we can manage our feelings.

MFL:

The children will continue to learn Spanish this term and will move on to days and months as well as learning to say when our birthday is.

PE:

The children will be focussing on athletics this term in preparation for Sports Day later in the year.

Music:

The children will continue to work with Mr Vinten in their music lessons this year.

Computing:

In computing this term, the children will begin looking at coding and pathways.
